

**INSTALLING 28MT SERVICE KIT**

**WARNING!!!** ALWAYS USE PROPER EYE PROTECTION WHEN PERFORMING ANY MECHANICAL REPAIRS TO A VEHICLE – INCLUDING, BUT NOT LIMITED TO, ANY INSTALLATION AND OR REPAIRS TO THE DELCO REMY STARTER. FAILURE TO USE PROPER EYE PROTECTION CAN LEAD TO SERIOUS AND PERMANENT EYE DAMAGE.

Only perform the mechanical functions that you are properly qualified to perform. Mechanical repairs that are beyond your technical capabilities should be handled by a professional installation specialist.

**Caution!!!** FOLLOW ENGINE AND/OR VEHICLE MANUFACTURER'S INSTRUCTIONS CAREFULLY WHEN REMOVING AND INSTALLING THE STARTERS.

**Install both parts provided in this kit.**

They may be different from the parts being replaced and must be installed together to be sure of proper starter operation.

The 10-tooth starter drive and drive housing in this kit are used to replace the 9-tooth drives and housings originally installed on certain starters. Because the drive pinions are different sizes, different starter mounting dimensions are needed for engagement with the engine ring gear. The new housing provides the proper starter mounting dimensions for the new drive pinion.
